Career Objective:

"A highly motivated and enthusiastic Engineering graduate with internship experience and current project exposure in full-stack development using HTML, CSS, JavaScript, React, Node.js, Express, and MongoDB. Seeking an entry-level position in IT/software to apply and grow my skills while contributing to the success of the organization."

Education

Bachelors of Technology in Computer Science Engineering , June 2018 – May 2022 **|** Kodad, India
Anurag Engineering college, Percentage: **CGPA:** 7.0

Skills

Front-End Technologies
HTML, CSS, JavaScript

Back-End Technologies
Node.js, Express.js

Frameworks /Libraries
Redux, Bootstrap, CSS, React

Tools
Git, GitHub, Postman

Databases
MySQL, MongoDB

Experience

Shimakh Technology LLP (Bangalore, Karnataka)

Role: Internship May 2023 - November 2023

- Developed and implemented a responsive GUI for the "**Banking Management System**" using Java and Java Swings.
- Executed complex database queries using MySQL to enhance system performance.
- Actively participated in the entire Software Development Life Cycle(SDLC), from concept to deployment.
- Demonstrated adaptability by quickly acquiring proficiency in Java Swing for GUI development during the **BMS** project.

Talentrise Technokrate Pvt Ltd (Nagpur, Maharashtra)

Role: Node.js Developer(Internship) September 2024 - December 2024

- Developed **RESTful APIs** using **Node.js** and **Express.js** for an inventory management project.
- Designed and implemented CRUD operations for managing inventory data, ensuring efficient and scalable solutions.
- Worked with **MongoDB** for database management.
- Collaborated with front-end developers to seamlessly integrate APIs with the user interface.
- Tested and debugged APIs using **Postman**.
- Implemented user authentication and authorization using **JWT** to secure APIs.
- Followed best practices in RESTful API design, including error handling and input validation.
- Used **Git** for version control and team collaboration.
- Participated in **Agile development processes**, including sprint planning, daily stand-ups, and code reviews.

Projects:

MAKEUPAPI WEBSITE [GitHub Link]

Tech Stack: HTML, CSS, JavaScript, Bootstrap, and React JS

- Created a dynamic product information page using **React Router** for smooth navigation.
- Designed a responsive layout using **HTML**, **CSS**, **JavaScript**, and **Bootstrap** to ensure compatibility across all devices.
- Implemented search and filter features for users to explore products by categories, brands, and types.
- Handled API errors gracefully to provide a seamless user experience.
  Tech stack used: HTML, CSS, JavaScript, Bootstrap, and React JS

ECOMMERCE WEBSITE [GitHub Link]

Tech Stack: HTML, CSS, JavaScript, Bootstrap, React JS, Node JS, and Express.

- Built a React-based e-commerce website with dynamic product listings and user authentication features.
- Integrated APIs to fetch and display product data, ensuring real-time updates and a better user experience.
- Designed a responsive and visually appealing layout using **HTML**, **CSS**, **JavaScript**, and **Bootstrap**.
- Used **Node.js** and **Express.js** to create a backend for handling user authentication and data management.

Authentication and File Management [GitHub Link]

Tech Stack: HTML, CSS, JavaScript, Bootstrap, React JS, Node JS, and Express.

- Created a web application featuring user login, a project dashboard, and file upload functionality.
- Implemented user authentication with secure session management to protect user data.
- Designed a responsive interface with a drag-and-drop file upload feature for ease of use.
